

CHALLENGER

CHALLENGER TRAVEL TRAILERS & FIFTH WHEELS BY DAMION CORPORATION

CHALLENGER

CHALLENGER FOR DISCRIMINATING BUYERS WHO WANT NOTHING LESS THAN AN ORIGINAL.

Do you have an eye for value? If so, look no further. Because when it comes to value, Damon Corporation has designed a true original. The Challenger line of travel trailers and fifth wheels.

Take a close look and you'll see what we mean.

The first thing you'll notice are the many features which come standard on Challenger Travel Trailers and Fifth Wheels.

Features which most RV manufacturers simply offer as options — if they are available at all!

Consider the beautifully contemporary and stylish designer fabrics which abound throughout every Challenger model.

Designer fabrics even cover the ceiling, not only adding to the visual appeal of the unit but also providing noise reduction and improved acoustics.

Beautiful upholstered chairs, reclining chairs, headboard, bedspreads, shams and drapes are tastefully coordinated in all the latest colors.

Other interior features include oak-framed cabinet doors, cedar-lined storage under the bed and a high-efficiency, floor-ducted heat system.

DINE IN STYLE.

The galley of the Challenger is designed to bring out the best in every household chef with the most modern conveniences available. Like microwave oven and three-burner, high-output range with oven. Large double-door refrigerator. Double-bowl porcelain sink. And much more.

Of course, the gourmet meals being created in the galley need to be enjoyed in a suitable atmosphere. The dining area of the Challenger is certainly up to the occasion. The rich oak-framed and glass insert doors would be the envy of the trendiest new restaurant.

DESIGNED. AND BUILT. FOR YEARS OF ENJOYMENT.

Unlike some competitive RV products, Challenger's stylishness and good looks aren't just a veneer. Every Challenger Travel Trailer and Fifth Wheel is designed and built for years of solid, dependable performance. Damon uses only the finest components on the market, then engineers its products for maximum durability and minimum maintenance.

The sidewalls are constructed of aluminum-framed laminated fiberglass. This extra-durable material is lighter than wood and metal and easier to repair, clean and tow.

That's not all. Radius skirting helps resist chipping and incidental damage. And Damon tops off the Challenger with an exceptionally durable rubber roof system that protects against leakage.

"Value. By design." That's how we describe the recreational vehicles we manufacture at Damon. With the new Challenger Towables, we believe we have truly mastered the art of providing exceptional quality at affordable prices. That's value. Value...by design.
