

You don't have to settle...

2003

Sprinter

TRAVEL TRAILERS AND FIFTH WHEELS

The 292 Sprinter fifth wheel interior has been redesigned for 2003, shown here in beautiful Symphony Sage. With this floor plan, you'll relax in swivel rockers while you gaze through the panoramic rear window to enjoy unobstructed, breathtaking views of your travels. The warm, rich, oak-finished cabinetry includes overheads at the rear and in the double slideout area, an example of how the easy-access storage (throughout your Sprinter) provides convenience while permitting an uncluttered, spacious environment. The look of today is further enhanced by upgraded carpeting and floor covering for 2003.

Greetings,

By utilizing our customer's wants, needs and desires as the foundation of our design, Sprinter has quickly become one of the top selling brands in America. Customers have returned time and time again to Sprinter, because of Sprinter's higher value, innovative floorplans, and array of features and amenities that were previously offered exclusively in high-line products.

Simply put, Sprinter offers more value for your dollar than any other brand in the recreational vehicle industry. As styles change and technology advances, we work to continuously make Sprinter the most comfortable and convenient RV on the road. We invite you to join the tens of thousands of satisfied Sprinter owners.

See you in the Great Outdoors,

General Manager

Above, Sprinter's 299 RLS floor plan in the Cranberry color scheme shows its comfortable, extra-large slideout room. Notice the hardwood raised panel, cathedral-style overhead cabinets, the soft lines of the residential quality upholstery, the designer window treatments, and the attention to detail in the entertainment center cabinetry. Another feature of all Sprinter slideouts—both 12-volt and 110-volt lighting—allows you to camp wherever you want to go, and not be left in the dark.

You don't have to settle...

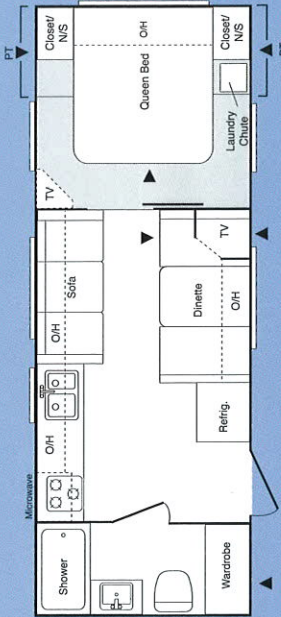

E-Z TOW TRAVEL TRAILERS

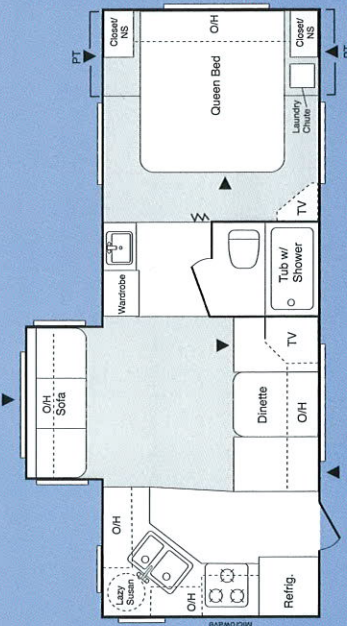

E-Z TOW—THE SMALLER, LIGHTER

Sprinter

WITH ALL THE QUALITY OF
OUR LARGER MODELS

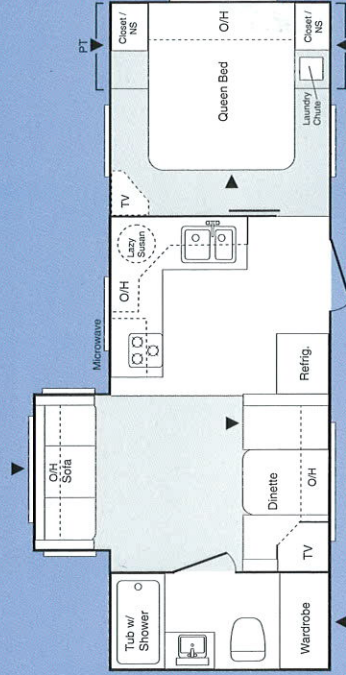

248 RB

249 RKS

For those who prefer a smaller, lighter unit, we offer the 2003 Sprinter E-Z Tow in lengths under 28 feet. The E-Z tow offers you all the quality, interior styling and convenience of our longer Sprinters, but it is lighter and also includes a sloped front-end profile to improve aerodynamics. The results—great space and style with E-Z towability. The name says it all.

MORE ▶

Our residential 60/40 white sink with matching high-spout faucet, so convenient for easy meal preparation and clean-up.

Every Sprinter includes a coat rack conveniently located near the entrance door. Touches like these in every corner of your Sprinter show you that we care about your comfort and convenience.

TRAVEL TRAILERS

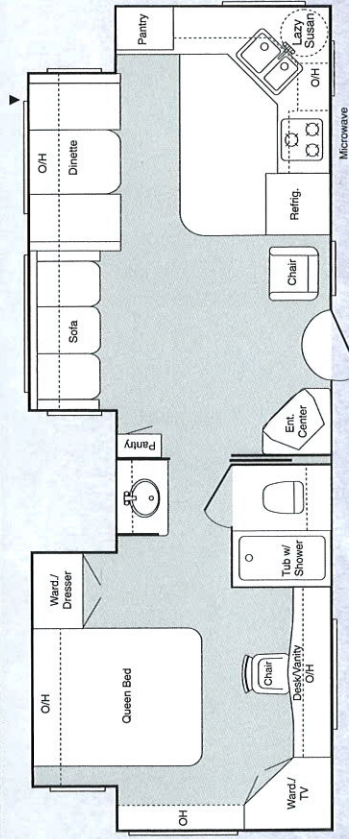

The Master Suite in the 300 FKMS is new for 2003. An oversize second slideout in the bedroom includes space for a floor-to-ceiling wardrobe with three deep drawers at the bottom. This frees up floor space and allows room for a vanity/computer work station with an upholstered, color-coordinated chair.

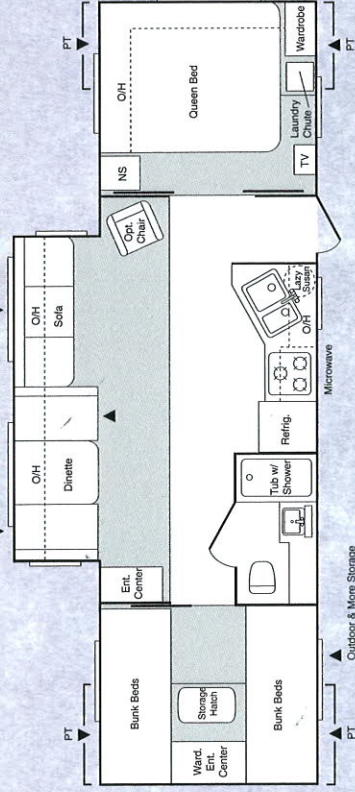

FEATURES YOU'LL FIND IN EVERY SPRINTER

Sprinter's conventional Travel Trailers and Fifth Wheels utilize Alumi-Guard™, our exclusive building technique. Alumi-Guard™ places aluminum in the critical areas of construction—around doors and exterior storage compartments, providing the protection that only aluminum can offer. Alumi-Guard™ extends the life of your Sprinter by protecting these areas from the damaging effects of moisture. Alumi-Guard™ is offered on all Sprinter products at the same price point our competition offers for wood alone!

5/8" One-Piece, Seamless Structurewood Floor with 25-year Manufacturer's Warranty, Glued, Nailed and Screwed to Joists

**Some floor plans do not accommodate all of these features

Look for the Space Maker™ Seal on every Sprinter product. It is your assurance that your Sprinter is equipped with our exclusive under-floor fresh water storage system. Saves space, resists freezing, enhances towability, and provides extra fresh-water capacity.

CONSTRUCTION

BUILT WITH INTEGRITY... from the inside out

- Cambered steel frame with extra supporting outriggers under every Sprinter RV.
- One-piece, seamless, 5/8" floor deck with a 25-yr. mfr.'s warranty.
- Rubber roof (12-yr. mfr.'s warranty) rolled over side and rear walls to eliminate seams and prevent potential leaks.

With Space-Maker,[™] useable storage space is greatly expanded by removing the fresh water tank from the interior of the unit. The Space Maker's location also lowers the center of gravity, improving towability. The heated compartment gives you added protection when cold-climate camping.

Welded aluminum supports in all raised-bath fifth wheel decks provide strength and rigidity in all critical high-stress areas.

- Fully-decked roof on trussed rafters, a full 5" thick, providing an R-11 insulation rating.
- Easy-opening entry steps with extra-low first step.
- Taller, wider entry door, radius corners.
- Outside storage doors.

Sprinter bunk models offer you unprecedented ease of access and storage capacities. Look how our Outdoor & More[™] storage,* shown here, has ample room for both parent's and kid's bikes. Or, take along a tent, barbecue grill or other oversize equipment. Outdoor & More offers 60 cu.ft. of space.

*available on most bunk models

SPRINTER VALUE

Sprinter value happens because we focus on the manufacturing process. We put the dollars that many companies spend on large advertising campaigns, ex-ecutive benefits, and costly office complexes into improving our products. We also strive to increase our manufacturing efficiencies while maintaining high quality. We achieve this high level of quality by employing a workforce from a community which still values craftsmanship. Finally, we listen to our Sprinter customers across the country. We learned a long time ago that great ideas come from the people who use our products daily. We appreciate and value this input and have implemented many of these ideas into our products.

The result of these efforts has been dramatic. Sprinter recreational vehicles are now seen everywhere—on the Interstates, on the Trans-Canadian Highway, from the Rockies to the Everglades, in just about any camping resort or national park you enter in the U.S. or Canada. We welcome you to join the Sprinter family of travel trailers and fifth wheels, where quality, comfort, and function meet.

Sprinter is a product of:
